-.

p) "vacuum chucking holes" (claim 19, line 23) has been changed to: --vacuum chuck--.

q) "to edges" (claim 19, line 24) has been changed to: -- to more than two edges--.

2. The following is an examiner's statement of reasons for allowance: the prior art reference alone or in combination fails to teach or suggest the claimed component holding head including "the main electrical holding unit holds the electronic component on straight lines substantially parallel to more than two edges of the electronic component and the main electrical holding unit has vacuum chucking holes locating in a vicinity of the position marks of the electronic component without covering the position marks" in combination with other limitations recited in dependent claims 1, 15 and 19.
